

ONE PLATFORM. COMPLETE VISIBILITY. BUILT BY WATER EXPERTS.

Scalable smart water solutions that solve everyday operational challenges.

WaterMinds® is a cloud-based platform that delivers real-time operational visibility, data-driven insights and predictive analytics across your entire water network. It transforms fragmented technical data and reactive operations into integrated intelligence that enables better decision-making and optimized water utility performance.

No SCADA? No Problem.

Get a fully managed SCADA solution—hardware, software, support—all without the upfront cost of a traditional system.

- Preconfigured hardware and intuitive dashboards—no in-house SCADA expertise needed.
- Lightweight HMI-style control from your phone or tablet
- Affordable monthly subscription
- 24/7 support and remote troubleshooting

The Inframark Difference

Inframark provides contract water and wastewater operations and maintenance services to more than 500 facilities across the country. The WaterMinds® platform leverages the same field-tested, operations-first expertise that has defined our service model for more than 40 years!

NETWORK AND TREATMENT IN ONE PLATFORM

Aggregate data for complete visibility across lift stations, treatment plants, and distribution systems—no more switching between multiple tools.

RAPID DEPLOYMENT WITHOUT IT OVERHAUL

Preconfigured hardware, intuitive dashboards, 24/7 support—operational benefits without capital-heavy infrastructure requirements.

MILITARY-GRADE SECURITY, UTILITY-FRIENDLY

AWS GovCloud hosting with DoD-level compliance. Secure enough for critical infrastructure, simple enough for daily operations.

INSTITUTIONAL KNOWLEDGE PROTECTION

Role-based dashboards ensure critical expertise stays accessible as staff changes—accelerate training and reduce operational risk.

WATER-SPECIFIC MACHINE LEARNING

Optimize chemical dosing to prevent compliance violations. Predict chlorine, phosphorus, and ammonia levels. Forecast time-to-overflow for lift stations.

Already have SCADA? Let's level up.

WaterMinds® overlays your existing systems to give you a single view across treatment plants, lift stations, tanks, collections and distribution systems.

- Works with your existing PLCs and SCADA
- Unified dashboards and reporting across all assets
- Advanced analytics, trending, and machine learning
- Cloud-hosted and accessible on any device

Seeing Is Believing!
